Dr. David Stone
The Council for Tobacco Research-U.S.A., Inc.
110 East 59th Street
New York, New York 10022

Dear Dr. Stone:

I am writing to ask the Council for support of The Third Gordon Research Conference on Proteolytic Enzymes and Their Inhibitors. This conference is to be held at Plymouth State College-South in Plymouth, New Hampshire on June 18-22, 1984.

As you were present at both of the preceding conferences in 1980 and 1982, you know that they were oversubscribed, exceptionally well-attended and that they generated considerable enthusiasm among the participants. In order to sustain this "tradition", Dr. Elliott N. Shaw (1984 Vice-Chairman) and I have developed what we hope is an excellent program for The Third Conference as well. We have taken care to represent some of the newest topics (including applications of recombinant DNA technology to protease and antiprotease research) and, at the same time, to make sure that Discussion Leaders review fundamental information, so as to make their sessions understandable to all participants. We have also made an effort to achieve a proper balance between chemical and biological aspects of the protease field. I think these features will become apparent, when you examine the enclosed program.

We are asking the Council for a sum of $5,000 to partially defray travel expenses of invited domestic and foreign speakers, an amount which represents approximately one-fourth of the needed resources. The balance is being solicited by applications to NIH and NSF.

The enclosures with this letter will provide further details. These enclosures are: (1) the proposed budget, (2) an explanation of our financial needs, (3) some background information regarding The Gordon Research Conferences on Proteolytic Enzymes and Their Inhibitors, and (4) The Program of The 1984 Conference.

*(Clinical Office At University Hospital)

If funds are approved by The Council, no part thereof will be used to support any conference participants from private industry. Dr. Alexander M. Cruickshank, Director of The Gordon Research Conferences, whose cover letter accompanies this application, will be the financial officer responsible for management of any funds which The Council may approve.

If any further information is deemed helpful, please do not hesitate to contact me.

Sincerely yours,

Aaron Janoff, Ph.D.
Professor of Pathology and
Chairman, 1984 Gordon Conference on Proteases
